Subject: Weymouth Monitoring Station Update

Hi Bob - I wanted to give you an update on our efforts to establish a permanent air quality monitoring station in Weymouth and get any feedback you may have before we finalize the location. We have been working with the Mayor's Office on the monitoring station location, and the Mayor's Office has been coordinating with residents and representatives of FRRACs to get their feedback. Two locations were being considered, one on Enbridge property next to the compressor station, and the other on a City-owned lot on Monatiquot Street nearer to residential areas. It now appears the City's preference is to locate the monitoring station on the Enbridge property next to the compressor station (see red square on attached schematic).

It is MassDEP's understanding that this location would meet EPA siting criteria (provided it meets distance away from nearby buildings), but due to how close the monitoring station would be to the compressor station it would be considered a source impact monitoring station based on EPA's network design criteria in 40 CFR Part 58 Appendix D, rather than a population oriented monitoring station.

I would appreciate your feedback on this location since we plan to include the monitoring station in our Massachusetts Air Monitoring Network Plan. Please let me know if you have any questions or need additional information. Thanks

Glenn Keith
Director, Air and Climate Division
